

To all Year 2 parents

Year 2 learning activities

Attached is a file containing learning activities in maths and reading. Some of the activities are graded in terms of challenge, one star being the easiest to three stars for the more challenging.

As well as these activities there are lots of websites such as NRICH, which offer maths challenges and problem solving activities at all levels. You will also be able to log in to Purple Mash using your home login and there are always fun things to do and learn on the BBC Bitesize website and Oxford Owl.

In writing you could invent a new game and write the instructions or write down recipes if you do any cooking. You could write a diary either about what you do or you could choose a favourite book character and create a diary for them.

Perhaps you could design and make an Easter garden and explain what you have included and why you have chosen to put them in your garden.
